Jan Kavach Mobile API Documentation

Updated live API reference • Beneficiary registration questionnaire & Eligible Schemes APIs included
Includes live production test verification for `/beneficiaries/{id}/eligible-schemes` and `/beneficiaries/{id}/eligible-schemes/next`

Environment	Live / Production Server
Base URL	`https://jankavach.indevconsultancy.in/public/api/mobile/user`
Authentication	Bearer access token for protected endpoints (`Authorization: Bearer <access_token>`)
Access token expiry	900 seconds (15 minutes)
Language	Login accepts `en` (English) or `hi` (Hindi); complete end-to-end API localization still needs verification
Registration & Matching	Live registration and scheme eligibility matching passed; tested on live server for Beneficiary ID 235 & ID 236 (`JK-UP-2026-000126`)

1. API Overview

#	Method	Endpoint	Authentication / Live Status
1	POST	`/auth/login`	No — PASS
2	POST	`/auth/refresh`	No — PASS
3	GET	`/dashboard`	Bearer token — PASS ; scoped to authenticated serviceman
4	GET	`/beneficiaries`	Bearer token — PASS ; scoped to authenticated serviceman (`field_user_id`)
5	GET	`/beneficiaries/{id}`	Bearer token — PASS ; ownership enforced via `field_user_id`
6	POST	`/beneficiaries`	Bearer token — PASS ; live registration & 27 questionnaire answers persisted
7	POST	`/beneficiaries/{id}/eligible-schemes`	Bearer token — PASS ; live tested on ID 236 (returns Eligible & Potentially Eligible schemes)
8	POST	`/beneficiaries/{id}/eligible-schemes/next`	Bearer token — PASS ; live tested on ID 236 (next-step workflow endpoint)
9	GET	`/beneficiaries/{id}/eligible-schemes`	Bearer token — Supported; fetches stored Eligible & Potentially Eligible matches
10	GET	`/schemes`	Bearer token — PASS ; live list response confirmed with pagination
11	GET	`/schemes/{id}`	Bearer token — PASS ; live detail response confirmed (example ID 40, ABHA)

#	Method	Endpoint	Authentication / Live Status
12	POST	`/auth/logout`	Bearer token — PASS

2. Authentication APIs

Login — `POST /auth/login` • Headers: `Content-Type: application/json; Accept: application/json`

```
{
  "username": "YOUR_SERVICEMAN_USERNAME",
  "password": "YOUR_PASSWORD",
  "language": "en"
}
```

Refresh — `POST /auth/refresh`

```
{
  "refresh_token": "CURRENT_REFRESH_TOKEN",
  "language": "en"
}
```

Logout — `POST /auth/logout` • Header: `Authorization: Bearer ACCESS_TOKEN` (Body: None)

3. Dashboard and Beneficiary APIs

- `GET /dashboard` — Returns dashboard summary and recent beneficiaries scoped to the authenticated serviceman (`beneficiaries.field_user_id`).
- `GET /beneficiaries?page=1&per_page=20&search=Example` — Paginated list of beneficiaries added by the logged-in serviceman. Supports `page` , `per_page` , `search` , `village_id` , and `journey_stage` .
- `GET /beneficiaries/{id}` — Returns full details of a single beneficiary if and only if `field_user_id` matches the authenticated serviceman.

4. Beneficiary Registration API & Questionnaire (27 Keys)

Method: `POST` • **URL:** `https://jankavach.indevconsultancy.in/public/api/mobile/user/beneficiaries`

Headers: `Authorization: Bearer ACCESS_TOKEN; Content-Type: application/json; Accept: application/json`

```

Section	Question key	Form label / purpose
Identity & Citizenship	`is_indian_citizen`	Are you an Indian Citizen?
Identity & Citizenship	`social_category`	Category
Identity & Citizenship	`social_category_other`	If Other, please mention (conditional)
Identity & Citizenship	`marital_status`	Marital Status
Household	`has_children`	Do you have any children?
Household	`girl_child_count`	No. of girl child (conditional)
Household	`boy_child_count`	No. of boy child (conditional)
Household	`children_under_18`	No. of children below age 18 (conditional)
Household	`children_in_school`	How many children are enrolled in school? (conditional)
Livelihood	`earning_status`	Do you earn?
Livelihood	`occupation`	Occupation (conditional)
Livelihood	`occupation_other`	If Other, please mention (conditional)
Livelihood	`occupation_registered`	Is the trade or business registered? (conditional)
Livelihood	`monthly_income_band`	What is your monthly income? (conditional)
Document Checklist	`doc_aadhaar`	Aadhaar Card
Document Checklist	`doc_pan`	PAN Card
Document Checklist	`doc_birth_certificate`	Birth Certificate
Document Checklist	`doc_voter_id`	Voter ID Card
Document Checklist	`doc_death_certificate`	Death Certificate of Husband/Father/Primary Earner
Document Checklist	`has_income_certificate`	Income Certificate
Document Checklist	`has_caste_certificate`	Caste Certificate
Document Checklist	`doc_ration_aay`	Antyodaya Anna Yojana (AAY) ration card
Document Checklist	`doc_ration_phh`	Priority Household (PHH) ration card
Document Checklist	`doc_disability_card`	Disability Card
Financial Inclusion	`has_bank_account`	Do you have a bank account?
Financial Inclusion	`phone_aadhaar_linked`	Is Phone Number Linked with Aadhaar Card?
Vulnerability	`vulnerability_group`	Vulnerability Group (multi-select)

5. Eligible Schemes APIs — LIVE TEST PASSED

When a serviceman adds a beneficiary and completes or saves their basic details/questionnaire, the mobile app calls the Eligible Schemes API to evaluate and display all government schemes for which the beneficiary is **Eligible** or **Potentially Eligible**.

Method	Endpoint URL Pattern	Purpose
POST	`/beneficiaries/{id}/eligible-schemes`	Evaluates scheme eligibility for beneficiary `{id}`, stores matches in DB, updates `record_status = "Matched"`, and returns `Eligible` and `Potentially Eligible` schemes.
POST	`/beneficiaries/{id}/eligible-schemes/next`	Next-step workflow endpoint after beneficiary registration/assessment; identical behavior and response structure to `POST /beneficiaries/{id}/eligible-schemes`.
GET	`/beneficiaries/{id}/eligible-schemes`	Returns stored `Eligible` and `Potentially Eligible` schemes for beneficiary `{id}` (automatically evaluates if never matched).

> **Backend Files (Mobile Folder Only):**
>
> - Controller: `app/controllers/mobile_api/EligibleSchemesController.php`
> - Service: `app/services/mobile_api/EligibleSchemesService.php`
> - Routes: `routes/mobile_api.php` (protected by `mobile_auth` middleware)
> - **Serviceman Ownership Rule:** Enforces `b.id = :beneficiary_id AND b.field_user_id = :user_id AND b.deleted_at IS NULL`. Returns `404 Beneficiary not found.` if the record belongs to another serviceman.

5.1 Live Test 1 — `POST /beneficiaries/236/eligible-schemes`

Method: `POST`
URL: `https://jankavach.indevconsultancy.in/public/api/mobile/user/beneficiaries/236/eligible-schemes`
Headers: `Authorization: Bearer ACCESS_TOKEN; Content-Type: application/json; Accept: application/json`
Request Body: Empty `{}` (or optional `{"answers": {...}, "complete": true}`)

Live Response Received (`200 OK`):

```

6. Schemes Catalogue APIs

- **`GET /schemes?page=1&per_page=20`** — Returns the paginated scheme catalogue (164 total schemes confirmed on live server).
- **`GET /schemes/{id}`** — Returns full scheme details including classification, geography, themes, beneficiary types, target groups, benefits, application process, documents, and eligibility rules.

7. Live Test Status Summary

Feature / Endpoint	Status from Shared Live Evidence
Login / Refresh / Logout	**PASS** — Confirmed on live server
Dashboard (`GET /dashboard`)	**PASS** — Scoped to authenticated serviceman ID
Beneficiary List & Details	**PASS** — Scoped to `beneficiaries.field_user_id`
Beneficiary Registration (`POST /beneficiaries`)	**PASS** — Tested up to ID 236; 27 questionnaire answers persisted in DB
Eligible Schemes (`POST /beneficiaries/{id}/eligible-schemes`)	**PASS** — Live response confirmed for ID 236 (`JK-UP-2026-000126`); 87 schemes evaluated, 5 returned

Feature / Endpoint	Status from Shared Live Evidence
Eligible Schemes Next (`POST /beneficiaries/{id}/eligible-schemes/next`)	PASS — Live response confirmed for ID 236 (`last_matched_at: 2026-10-12 11:03:56`)
Schemes List & Details (`GET /schemes` , `GET /schemes/{id}`)	PASS — Live responses confirmed (164 total schemes; detail tested on ID 40)

8. Mobile Workflow & Security Notes

1. **Login:** Serviceman logs in via `POST /auth/login` and stores `access_token` and `refresh_token` .
2. **Register Beneficiary:** Serviceman submits household member details and 27 questionnaire answers via `POST /beneficiaries` .
3. **Fetch Eligible Schemes:** Mobile app calls `POST /beneficiaries/{id}/eligible-schemes` (or `/next`) with the returned beneficiary ID.
4. **Inform Beneficiary:** App displays the returned `eligible_schemes` and `potentially_eligible_schemes` (benefits, missing documents, and application process) so the serviceman can guide the beneficiary.
